

CE-AFI CENTRAL EUROPEAN ASSOCIATION OF FIRE INVESTIGATORS

Eva Ljungkvist is employed by the Danish National Police at the National Forensic Services and as a specialist in fire investigations.

Eva Ljungkvist is a fire protection engineer and a fire investigator with more than two decades of experience in incident response, fire protection and fire investigation. Eva started in the Swedish Fire Service and over the years she has gained experience from working with i.e. the investigation of Sweden's worst serial arsonist.

Since the last couple of years, Eva Ljungkvist has together with Benny Thomsen been working with developing the forensic science unit at the Danish police.

Eva is the secretary of the IAAI subchapter "the Nordic Association of Fire Investigators" and of the European Network of Forensic Science Institutes.

It is in this mix of – fire engineering, forensic science and hard police work, that Benny and Eva thrive. They are recurring speakers at conferences in Denmark and in Europe. In June 2018 they gave lectures on the ENFSI conference *How to shed some UV light on the fire scene* and *Pyrolysis products are a recurrent headache for fire investigators; can a developed Dynamic Headspace be the needed painkiller?* .
